50X1-HUM

7. Unterwellenborn (J 64)

The Maximilianshütte employs 3,400 workers. State subsidies are needed to run this foundry.

8. Leipzig (E 21)

Elektrogiesserei Max Jahn employs 450 workers, of which 60% are technicians.

9. Böhlitz-Ehrenberg (E 21)

- a. Metallguss-Gesellschaft employs 1,150 workers.
- b. Deutsche Kugellager Fabrik employs 1,100 workers on reparations. Shortage of raw materials is seriously holding up production.

10. Dresden (F 29)

- a. Zeiss-Ikon has developed a new machine for testing thread strengths of textile machines; this brings the machine automatically to a standstill in the case of any aberration.
- b. Seamag (Sächsische Cartonnagen-Maschinenfabrik AG) is a State-owned plant.

11. Meerane (K 36)

The Kammgarnspinnerei has not been dismantled nor taken over. It has 380 employees and a capital of 1.8 million RM.

12. Freyburg (J 89)

The Kalkstein Werke employs 66 hands and produces 848 tons per month.

13. Grossenhain (A 01)

The Grossenhainer Webstuhl und Maschinenfabrik (belonging to Unionmatex) was dismantled in 1946. It is now being rebuilt as a State-owned plant and employs 37 workers.

14. Zeitz-Teuglitz (K 08)

Brabag hydrogenation plant has been rebuilt and employs 7,000 workers.

15. Wernigerode (D 16)

Vereingte Harzer Portlandzement und Kalkindustrie AG (formerly an SAG) is now State-owned with branches in Rubeland, Elbingerode, and Huttenrode. Produces raw lime for sugar production.

16. Rudersdorf (VO4)

The Kalkzement und Betonwerk was formed as a State owned plant on 1 April 1947. It was formed from the former Preussag and Adler works. It has 1,600 employees and produces lime (manures).

Comment: An F-source, reporting as of 16-18 August 1947, stated that the number of employees is 1,400, and that production comprises quicklime, hydraulic lime, "Stückenalk", and lime for fertilizers. Eighty percent of the production is for reparations at the price of 24 RM per ton. Rudersdorf lime contains bauxite, which before 1939 used to be sent to Lauta. In 1939, a plant for producing aluminum was built at the cost of 80 million RM. The inventor of this process, a chemist, is still living in Rudersdorf, but is working as a laboratory assistant.

50X1-HUM

17. Misleben (I 63)

The Mansfelder Kupfer und Schieferbergbau AG is State-owned. The firm requires considerable subsidies, as the semi-finished materials are produced in Wettstedt/Harz, which is still an SAG.
